Subject: PABIODIV: Land Conservation Workshop
Date: Tue, 13 Jan 2004 14:16:23 -0500 (EST)

Forwarded from Natural Lands Trust:

Implementing Strategic Conservation: Establishing Criteria Saturday, February 7, 2004 9:00 am - 4:00 pm Natural Lands Trust, Media, PA Course Leader: Ole M. Amundsen, III

Have you ever wondered how to set your land protection priorities or how to say "no" to a land conservation project? Have you ever considered how to review your land protection options? If so, this workshop is for you. In this workshop you will learn the importance of land acquisition criteria, how to develop these criteria for your organization, and how to adopt and use these criteria.

Audience

This workshop is intended for new or established land conservation organizations (land trusts, township entities, and watershed organizations) that wish to create or refine their strategic land conservation program.

Outcomes

At the end of the workshop, your organization will be more strategic in its protection efforts because the organization will know how to: - use criteria to focus its conservation work; - develop draft criteria; and - create a plan for adopting or moving forward with these criteria.

This workshop will help your organization meet Standard 8 of the Land Trust Standards and Practices , "Standard 8: Selecting Projects - A land trust must select the best available method for protecting each property."
