Subject: Multiflora Rose & Purple Loosestrife Experts Needed

In addition to working within the Kiski-Conemaugh River Basin and western PA on invasive species threats to biodiversity, such as Japanese knotweed, the Westsylvania Native Biodiversity Program is also initiating valuable collaboration with the Juniata Clean Water Partnership concerning its invasive species problems. As a first step, native biodiversity conservation workshops within Blair, Huntingdon, and Mifflin counties have tentatively been scheduled for Aug. 5-7, with details TBA. We are currently looking for experts on multiflora rose and purple loosestrife control to come to these workshops and speak to Juniata Watershed residents about what they can do about problems with these species. If you know of any potential speakers, please let me know.

Thank you for your assistance!
Kristin Sewak

The Program is currently supported through the Western PA Watershed Protection Program, PA DEP, PA DCNR, and the National Fish and Wildlife Foundation's "Pulling Together Initiative", with USDA Forest Service funds.

The Pennsylvania Biodiversity Listserve encourages open discussion about biodiversity issues in the state. It is hosted by the Allegheny Institute of Natural History, University of Pittsburgh-Bradford and is moderated by the Pennsylvania Biodiversity Partnership. The opinions expressed in messages are those of the authors and NOT the Pennsylvania Biodiversity Partnership.
