Subject: DEP Groundwater Protection

Whether you're concerned with forests, watersheds, fish, wildlife, trails or landfills, groundwater is involved. The newly revised Groundwater Protection webpage is now online at the DEP website www.dep.state.pa.us (type "groundwater protection" in the directLINK box).

Everyone should have a basic knowledge of what happens to water after it infiltrates below the surface. This website now includes the online version of the groundwater education publication "Groundwater - Pennsylvania's Cool Resource" and other links to learn about groundwater in Pennsylvania. Go to: <http://www.dep.state.pa.us/dep/deputate/watermgt/wc/subjects/groundwaterprotection/default.htm>

Yours in conservation,

R. Martin

The Pennsylvania Biodiversity Listserve encourages open discussion about biodiversity issues in the state. It is hosted by the Allegheny Institute of Natural History, University of Pittsburgh-Bradford and is moderated by the Pennsylvania Biodiversity Partnership. The opinions expressed in messages are those of the authors and NOT the Pennsylvania Biodiversity Partnership.
