Subject: PABIODIV: Huplits Wildlife Grant Competition

Forwarded from the Sierra Club:
NINTH ANNUAL HUPLITS WILDLIFE GRANT COMPETITION

Huplits Wildlife Grants are administered by the Sierra Club to help protect wildlife and its habitat in Pennsylvania. Each year a competition is held to award up to eight grants to Sierra Club groups and other conservation organizations. For 2006 the total funds available for the annual Huplits Wildlife Grant Competition amount to about \$85,000.

Applicant organizations are asked to consider the following guidelines:

- Preference will be given to projects that will have the greatest potential impact on the long-term protection or enhancement of wildlife and/or its habitat in Pennsylvania.
- The project may involve public education, litigation, scientific research, land acquisition, etc.
- Credit will be given to projects that foster involvement of Sierra Club grassroots activists in the protection of wildlife and its habitat.
- Projects will normally be funded for no more than two years, but under special circumstances a project may be extended.

A project proposal should describe the overall goal, objectives, major activities, resources required, timelines, and a reasonably detailed budget. Special attention should be given to the measurable benefits of the project.

Proposals should be submitted before APRIL 30 to Peter Wray at <pjwray@verizon.net>. If you have any questions, please do not hesitate to contact Peter.
