Folks, This has the potential to be a very useful tool for land managers and restoration practitioners in Pennsylvania. Please take time to consider submitting your projects.

Subject: [ma-eppc] Last Call for Restoration Information

Final Call for Restoration Technique Stories

The National Park Service Ecosystem Restoration Program is sponsoring an effort to develop a database of restoration techniques related to alien plant invasions. We are sending out this final request for information to all regions of United States. We would like to hear about what techniques you are testing to restore native plant communities after weed control, and what you have learned. The information we collect will be used to develop a database accessible to land managers.

Please click on the link below to respond to the posted questions. If you would rather relay your experiences via phone or in person please call

Jennifer Sunderland at (970) 231-9069.

Thank you,

Jennifer Sunderland
