Field Geology of The Appalachian Mountains
June 20 - 22, 2005 (Mon - Wed)
Bucknell University and surrounding environs
Craig Kochel, Ph.D. and Richard Nickelsen, Ph.D.

This course has become one of PICE's most popular offerings. The teaching team of Drs. Craig Kochel and Richard Nickelsen combines over 60 years of professional geology and natural history and the unique ability of bringing this complicated subject down to an understandable level for participants of all backgrounds. Joining this incredible team is Jim Brett, internationally recognized naturalist, who will serve as a natural historian during your experience. Field Geology will find the class in ancient glacial outwash plains, in a geomorphological mix of the Ridge and Valley Province of Central PA where Africa and North America engaged in collision course 300 million years ago, and much more. For classroom teachers, educators and others interested in bringing geology into their educational programs, this exciting 3-day program is loaded with field and hands-on experiences, energy and absorbable knowledge. Apply early to secure a space. Tuition: \$385; includes meals, overnight accommodations, instruction and a minimum of 20 hours of ACT 48. DEADLINE: MAY 16.

Scholarships are available (how to apply is located in the catalog).
