All Species Foundation <http://www.all-species.org/>

"The ALL Species Foundation is a non-profit organization dedicated to the complete inventory of all species of life on Earth." This daunting task has important implications for effective conservation, environmental impact studies, and understanding ecosystem functioning. An important feature of the site is the Species Search Engine that includes over 1 million species. An organism can be found by partial or complete name; either scientific or common names are recognized. Each entry provides a link to one of 12 databases for more information on the species.

The Pennsylvania Biodiversity Listserve encourages open discussion about biodiversity issues in the state. It is hosted by the Allegheny Institute of Natural History, University of Pittsburgh-Bradford and is moderated by the Pennsylvania Biodiversity Partnership. The opinions expressed in messages are those of the authors and NOT the Pennsylvania Biodiversity Partnership.
