From the League of Conservation Voters - Pennsylvania's Congressional Delegation Ranks 12th in the Nation on 2002 National Environmental Scorecard

WASHINGTON - Pennsylvania's congressional delegation earned an average score of 46 percent for their House members, 12th highest in the nation, and 28 percent for their Senators, in the 107th Congress as tracked by the League of Conservation Voters 2002 National Environmental Scorecard. Nationally, House members averaged 43 percent and Senators 47 percent.

"The people of Pennsylvania should be proud of Arlen Specter, Curt Weldon and Jim Greenwood for their balanced, responsible bipartisan leadership when it comes to protecting the environment," said Deb Callahan, LCV president. "Tim Holden and Joe Hoeffel have once more proven that they put the interests of Pennsylvania families in a clean and healthy environment first, while the poor scores of Pat Toomey and George Gekas show that they remain on the side of corporate polluters."
