From the Natural History Museum (aka British Museum of Natural History):

#### EXPLORING BIODIVERSITY

This new online interactive learning exhibit from the Natural History Museum in London helps younger students begin to learn about the nature and complexity of understanding biodiversity. Divided into small sections, this interactive site includes many short exercises that will help students engage the concept of biodiversity. Other resources on the site include a glossary of important terms related to biodiversity and a feature where visitors can look up species by common name, genus, and other categories. <http://internt.nhm.ac.uk/eb/index.shtml>

\*\*\*\*\*

The Pennsylvania Biodiversity Listserve encourages open discussion about biodiversity issues in the state. It is hosted by the Allegheny Institute of Natural History, University of Pittsburgh-Bradford and is moderated by the Pennsylvania Biodiversity Partnership. The opinions expressed in messages are those of the authors and NOT the Pennsylvania Biodiversity Partnership.
